

THE ESOTERIC SCIENCE-THE SCIENCE OF CONCIOUSNESS

By: Joseph Majdalani

The Esoteric Science is the science of the man of the future in the Aquarian Age, the new Age of Enlightenment and Knowledge.

The Esoteric Science is the science of the human nature of man-the-aspirant, who is seeking perfection! It is the technique of "knowthyself" in a practical sence.

The Esoteric Science is the science of the invisible, before it is the science of the visible... The science of truth of reality. It is the science of man before it is a humane science.

The Esoteriic Science is the application of knowledge in life, and the understanding of life in nature. It is the unfoldment of the cosmic mystery dormant in the being of man... And the awareness of the soul in the body!

The Esoteric Science is the science of causes before effects... And the understanding of effects in the course of their causes! It is the science of the future in the light of the past... And the perception of the past through the awareness of the future! It is the comprehension of everything that goes inside the human being, before comprehending what goes around him: The self-understanding of man, before examining his surrounding!

The Esoteric Science is the study of hidden aspect of cells in biology... It is the art of cure in medical sciences... And the understanding of the exact oderliness in the science of the brain! It is the pricipal e of giving in the science of the heart... And the accuracy of precision in neurology... It is the comprehension of laws in the atomic sciences... And

the secret of sublimation psychology!

-- Of religion, it is the application of LOVE...

-- Of doctrine, it is the firmness of belief in self...

-- Of manners, it is proper behaviour and the performance of good deeds...

-- Of architecture, it is the solidity of structure and the tenacity of edifice...

-- Of drawing, sculture, and ornamentation, it is the magic of enchantment, arrangement of colors, and the splendour of form...

-- Of arts, it is the accuracy of observation...

-- Of culture and education, it is the principle of communication...

-- Of sociology, it is the art of listening tender treatment and honest human relationship...

-- Of literature, it is the eloquent style, and the skill of concealing the meaning between the lines of expression and the horizon of vision...

-- Of numerology, it is the secret of the cipher, the enigma of the zero! It is the core of every science and the soul of knowledge!

It is the hidden secret in sciences, the enigmatic part and the mysterious truth...

The Esoteric Science is the study of Man's multiple constituents and contents: the study of all dimensions of man including the hidden, the unknown and the mysterious... for the purpose of blowing away the dust from his latent truth!

The Esoteric Science is the practical application of every knowledge that man gains in his daily life. Its application is for the purpose of evolving and advancing human awareness, culture and civilization, which is also the goal that has always ppelled (mundane) science.

The Esoteric Science is the science of waging the greatest and most sacred of

wars:

That of Knowledge against Ignorance...

Of Consciousness against Unconsciousness...

Of Positiveness against Negativity...

Of Light versus Darkness...

It is that of Regeneration versus Stagnation!

The Esoteric Science is the science of challenge, challenging the self and overcoming the self for the sake of conducting her to the best, the most comprehensive and the perfect!

The Esoteric Science is the science of planning and of discipline, for discipline is the epithet of consciousness and advancement. There is no consciousness without discipline and no discipline without consciousness. For the two are inseparable companions!

The Esoteric Science is that of duty and responsibility. The duty of man towards himself and others... and his responsibility for his actions, behaviour and acquisitions. Man's duties towards himself are acquiring consciousness and rising in consciousness. Therefore, let his positiveness gain ascendancy over his negativity... So that his actions may breed the consequences!

The Esoteric Science is the love help and giving... The sincerity of feeling... The yearning of love... The force of thought... The faultlessness of opinion... The precision of discrimination... And detachment in judgement! It is the innocense of wisdom and the wisdom of innocense... The purity of soul, and the uprightness of purpose!

The Esoteric Science is the method of comparison and learning from mistakes of others to avoid pitfalls. It is self-conviction that man has the right to self-knowledge, and to continuous progress without fear, hesitation and timidity! It is the art of confrontation, the boldness of combat and the courage of defiance... As long as the purpose is gaining consciousness and rising in consciousness!

The Esoteric Science is the knowledge of when to light a candle in the dark without causing a fire...

And when to put out a candle, to light it in the hearts...

When to give an advice without being consulted...

And when not to give an answer before a question is asked...

When to step forward so as not to waste time...

And when to wait a little so as not to lose time...

When to progress in consciousness...

And when to fathom the depth of knowledge...

When to sail towards the horizon of understanding...

And when to row towards the shore of security...

When to look towards the distant far...

And when to meditate upon what we have...

When to speak, and when to listen...

When to lead, and when to follow...

And when to ask for freedom...

When to be captivated by love...

And when to set love free...

When to speed up and when to slow down... to meditate upon the distances ahead of us.

The Esoteric Science is the path of acquiring the knowledge of man, and of applying this knowledge in life for the purpose of attaining wisdom—the aim and goal of everyone on Earth. It is the science of the future in the present...

And the awareness of the created in the Creator!

It is the realization of unity and the achievement of perfection!

This is the Esoteric Science, the science of man as a whole... who is aspiring to the perfectness of his consciousness.

Blessed are those whose aim is this science.

Happy is he whose system of life and work move along this humane thoroughfare.

And most blessed are those who reached the summit but did not lose sight of those who are still at the bottom of the mountain!
